NGUYEN MINH KHANH
FRONT-END DEVELOPER INTERN

ABOUT ME

I am a Computer Science undergraduate with a strong interest in Frontend Development. I have a solid foundation in web technologies and experience building user interfaces using modern frameworks. I am detail-oriented, eager to learn, and motivated to improve my technical skills through real-world projects and internship opportunities.

Portfolio: https://nguyenminhkhanh-portfolio.vercel.app/

CAREER OBJECTIVE

Aspire to become a skilled Frontend Developer specializing in responsive, user-friendly web apps using technologies like React.js and Tailwind CSS. As a Frontend Intern, eager to apply academic knowledge and project experience in real-world projects, contribute meaningfully under professional guidance, gain hands-on experience, and continuously learn to grow into a competent developer. Fully available for a full-time internship, with flexibility for part-time arrangements or long-term opportunities based on company needs.

ACADEMIC PROJECTS

POS Website System   01/2025 - 04/2025

Role: Frontend Developer & Tester

Description: Built a Cosmetics POS web application with product and order management; designed the Admin Dashboard and conducted manual testing to improve UI/UX and usability

Technologies: ReactJS, TypeScript, TailwindCSS, Material UI

GitHub Repo: https://github.com/BiNe484/cosmetic-pos/
(Personal repo migrated from school account)

Android Banking App   03/2025 - 05/2025

Role: Developer & Tester

Description: A mobile banking simulation application following a client-cloud architecture, featuring user management, account and transaction handling, ticket booking, and basic location services

Technologies: Java, Android Studio

GitHub Repo: https://github.com/BiNe484/android-banking-app/
(Personal repo migrated from school account)

Cinema Ticket Booking Website   04/2024 - 05/2024

Role: Frontend Developer

Description: Developed a cinema ticket booking website focusing on frontend structure, page layout, and user interaction flows. Gained hands-on experience in building UI with HTML/CSS and integrating frontend features with PHP-MySQL backend

Technologies: HTML, CSS, PHP, MySQL

GitHub Repo: https://github.com/BiNe484/web-cinema/
(Personal repo migrated from school account)
